

R.D.B.M.S.

IMP BY ABHAYKUMAR

UNIT - 1

- (1) Define Concurrency and explain Concurrency problem**
- (2) Define Recovery and explain System Recovery**
- (3) What is Transaction ? Explain ACID Properties**
- (4) What is Locking ? Explain Different Types of locking**

UNIT - 2

- (1) Explain types of Joins**
- (2) Explain Set Operators with example**
- (3) Explain String Function**
- (4) Explain Aggregate Function**
- (5) Discuss the types of Constraints**
- (6) Explain DDL Command with example**
- (7) Explain DCL Command with example**
- (8) What is the use of Drop Command ? Explain DML Command with example**
- (9) Explain Grant and Revoke Command with example**

UNIT - 3

- (1) Explain Cursor in details**
- (2) Explain PL/SQL data types**
- (3) Explain Exception Handling**
- (4) Short Note: PL/SQL Block**

UNIT - 4

- (1) Difference between Trigger and Procedure**
- (2) Short Note: Sequences**
- (3) What is View ? Explain different types of view with example**
