Important Questions
Computer Security- II

1. **Define the following:**
   1. **Cyber Security**
   2. **Encryption**
   3. **Interruption**
   4. **Spam**
   5. **System Abuse**
   6. **Cryptanalysis**
   7. **Sniffing attack**
   8. **Cryptography**

2. **Short Questions:**
   1. **Give full form of this, SMTP, MIME, SSL, DES, AES, DSS, POP, SET, STT**
   2. **List out causes of Vulnerability in system.**
   3. **Who is Hacker?**
   4. **What is Interruption?**
   5. **What is System vulnerability**?

3. **Long Questions:**
   1. **List out and explain application of Cryptography.**
   2. **How many types of Security attacks? Explain Modification in details.**
   3. **What is System abuse? Explain in details with example.**
   4. **How to prevent from control against threats?**
   5. **Differentiate between Plain text and Cipher text.**
   6. **Explain System Vulnerability and write causes of it.**
   7. **Explain Password Management with its challenges.**
   8. **Differentiate between Encryption and Decryption.**
   9. **What is plain text? Explain with proper example.**
   10. **Differentiate between Encryption and Decryption.**
   11. **Define Cryptography, Discuss about types of Cryptography in details.**
   12. **Discuss about MIME in details.**
   13. **Discuss about Cryptanalysis techniques and attacks in details.**
